When doing a color match to existing cabinets it is never an exact science. We do our very best to ensure that it is the closest match possible, but it will NOT be an exact match all the time. Different lighting will bring out different metamerisms in colors and every person sees colors a little differently. We require you, as the customer, to follow the steps listed above to help us ensure that your match looks the best it possibly can. We also want to make you aware that due to the nature of wood the new pieces that we are making with the color match may age differently than your existing cabinetry. A few years from date of install they may not match as closely as they did at the time the new cabinets were installed.
